EDUINT LIMITED

AI · CAPITAL MARKETS

A SIX-MONTH ENGAGEMENT PROPOSAL

Client Experience, Monthly Audit & Automation Platform

A turnkey partnership for Bangladeshi merchant banks, brokerage houses and asset management companies — a client-facing web & mobile experience, monthly compliance audits, and operations automation, delivered as a monthly subscription with no upfront capex.

PREPARED BY

Eduint Limited

Syed Adnan Huda, CFA

PREPARED FOR

Merchant Banks, Brokers & AMCs

ENGAGEMENT

6-Month Minimum

Opex only

VALID UNTIL

30 Jun 2026

founder@aibd.ai · support@aibd.ai · abaci.aibd.ai

V 2.1 · 24 April 2026

01 · EXECUTIVE SUMMARY

The opportunity, in one page

Bangladesh's capital market is at an inflection point. BSEC is pushing for modern investor experiences, stronger compliance hygiene, and better retention of retail investors. Yet most merchant banks, brokerage houses and asset management companies still run on first-generation back-office systems, paper-driven onboarding, spreadsheet-based NAV calculations, and Excel-driven monthly audits.

Eduint Limited offers a ready-made path forward: a fully-built fintech platform — proven in production as *Abaci Investments* — that your firm can white-label, plus monthly compliance audits and operations automation, delivered as an inclusive subscription.

40+	3	6 mo.	0
READY-TO-DEPLOY MODULES	TIERED PLANS (1L / 1.8L / 3L)	MINIMUM ENGAGEMENT	CAPEX — PURE OPEX MODEL

What you get

- **Client / Investor Experience Platform** — a branded web + mobile portal: dashboard, portfolio, demo trading, learning, IPO, KYC, Halal screening — and for AMCs: multi-fund NAV, SIP, unit & tax certificates, dividends.
- **Monthly Compliance & Operational Audit** — a structured monthly report on trade exceptions, BSEC rule alignment, margin monitoring, reconciliation gaps, NAV approvals, and KYC freshness.
- **Operations Automation** — EOD replay, fund accounting, custodian ops, broker-order triage, reconciliation, fee/commission, NAV workflow, dividend runs and SIP collections.
- **Joint Go-to-Market Partnership** — we will co-sell with your firm so the platform can be offered to *your* downstream institutional, corporate and AMC clients as a revenue channel.

> **Why now:** Every new retail investor you onboard today through a 1999-era portal is a retention risk. The cost of building this in-house is 8–10 crore BDT and 18 months. Eduint compresses that to one month of onboarding and a fixed monthly fee.

02 · ABOUT US

Eduint Limited — the learning & technology partner for Bangladesh's capital markets

Eduint Limited is a Bangladesh-based **AI-driven capital-markets solutions company**, founded by the former COO of UCB Stock Brokerage Limited — Bangladesh's #1 brokerage house. We build, operate and license production-grade software that bridges the gap between retail investors and the institutions that serve them: merchant banks, brokerage houses, and asset management companies.

Our focus

- Client-facing investor platforms (web + mobile)
- Trading & portfolio management software
- Investor education & certification
- Compliance automation (BSEC rule alignment)
- Back-office automation (EOD, reconciliation, custody)

Our flagship product

Abaci Investments (abaci.aibd.ai) — a full-stack investor education, demo trading, and portfolio management platform currently serving as Eduint's reference implementation. All features described in this proposal are live or have passed internal QA on the Abaci codebase.

Why merchant banks and brokers choose Eduint

No capex
Monthly subscription, opex-only.

White-labeled
Your brand, logo, colors, domain.

Local-first
Built for DSE/CSE, BDT, Bengali + English.

BSEC-aware
Rules embedded in the product layer.

Halal-ready
Shariah screening built in.

Production-grade
Modern stack, audited codebase.

Fast to launch
30 days from signature to go-live.

Integrable
Plugs into your OMS & CDBL.

Scalable
Cloud-native, elastic by design.

02A · LEADERSHIP

Founder spotlight — Syed Adnan Huda, CFA

Syed Adnan Huda, CFA — known to partners and clients as **Adnan** — is the Founder of Eduint Limited. After seven years as Chief Operating Officer of **UCB Stock Brokerage Limited**, the *number-one brokerage house in Bangladesh*, Adnan made the call very few at his level in capital markets are willing to make: **he stepped down from the COO chair to build full-time**.

The trigger was a first-hand realisation of just how much AI and modern software were going to reshape investor experience, surveillance and back-office operations — and how far behind Bangladesh's capital-markets infrastructure was falling. He founded **Eduint Limited**, acquired the **aibd.ai** domain, and set out with a single mission: to become Bangladesh's leading AI-driven solution provider for merchant banks, brokerage houses and asset management companies.

A CFA charterholder since 2013 and active member of CFA Society Bangladesh, Adnan brings close to two decades of hands-on experience across asset management, merchant banking, equity research, portfolio management and brokerage — touching every segment this proposal is designed for.

CAREER PATH

- B.A. in Economics, City University of New York (CUNY), USA
- Investment Analyst & first employee, *Prime Finance Asset Management Co. Ltd.*
- Fund Manager, *Prime Finance AMC* — managed USD 10M AUM; co-launched Bangladesh's first private-sector open-ended mutual fund in 2010
- CFA charterholder, 2013
- Head of Research, *Prime Bank Investment Limited*
- Head of Portfolio Management Department, *BRAC EPL Investments Limited*
- Portfolio Rebalancing & Fund Selection, *Minerva Planning Group*, Georgia, USA (remote)
- Chief Operating Officer, *UCB Stock Brokerage Limited* (2018 – 2026) — Bangladesh's #1 brokerage house
- **Founder, *Eduint Limited*** — acquired *aibd.ai*; full-time focus on AI-driven solutions for capital markets

Why this matters to you.

- A CFA charterholder leads the product and compliance roadmap.
- Seven years running the #1 DSE brokerage as COO — inside knowledge of every ops, risk and compliance workflow.
- Experience across AMC, merchant bank and brokerage — under one roof.
- Full-time focus on Eduint — not a side project.

SEGMENTS ADNAN HAS BUILT AND RUN

Asset Management · Mutual Funds · Equity Research · Portfolio Management · Investment Advisory · Brokerage / DSE · Merchant Banking · Fintech & AI

THE FOUNDER'S PLEDGE

> *"I left the COO chair at Bangladesh's top brokerage house because the next decade of capital markets will be written in software and AI — not in spreadsheets. Eduint exists to make sure Bangladeshi merchant banks, brokerages and AMCs aren't left behind."*
>
> **— Syed Adnan Huda, CFA, Founder · Eduint Limited**

EARLIER, ON THE CFA JOURNEY

"There is an immense need for young professionals to gain a deep understanding of financial markets through structured training, and emphasis on ethical judgement, in order to make more informed decisions." — CFA Institute, Bangladesh Career Guide (2018)

For any matter relating to this proposal, reach the founder directly at **founder@aibd.ai**, or the Eduint team at **support@aibd.ai**.

03 · WHO THIS PROPOSAL IS FOR

Three kinds of capital-markets firms — one platform

Eduint's platform has been built and hardened across three distinct business models. Each inherits the same core, but turns on a different set of modules.

MERCHANT BANK

Regulated issue manager & PMS provider

You run PMS, margin loan books, IPO issue management, trust & underwriting. You need a client portal, KYC, investor reporting and BSEC-aligned compliance automation.

KEY MODULES

- Client onboarding & KYC
- Portfolio management & P&L
- Margin loan monitoring
- IPO subscription workflow
- BSEC rule library

BROKERAGE HOUSE

DSE / CSE TREC holder

You execute trades, maintain BO accounts, settle with CDBL, run dealer desks. You need a modern retail app, demo/paper trading, EOD replay, and reconciliation automation.

KEY MODULES

- Retail trading app (web + mobile)
- Demo trading & coaching
- EOD replay & statements
- Broker-order triage console
- Three-way reconciliation

ASSET MANAGEMENT CO.

Mutual fund / unit fund manager

You manage open-ended / closed-ended funds, calculate NAV, accept SIPs, issue unit & tax certificates, distribute dividends. You need to replace spreadsheets with an investor portal and fund-accounting engine.

KEY MODULES

- Multi-fund NAV entry & history
- Investor portal & SIP
- Unit & tax certificates
- Dividends & statements
- Fund reports & audit log

Shared spine — different audiences

All three firm types share the same underlying technology spine, data model and compliance engine. You inherit everything Eduint has built across all three segments, even if you only turn on the modules relevant to your licence.

Why this matters. Most Bangladesh vendors specialise in *one* segment. If you're a group with a brokerage & an AMC, or a merchant bank that's applying for an AMC licence, Eduint is the only provider that covers the full stack under one contract.

04 · PROBLEM STATEMENT

What's hurting your firm today

Through conversations with merchant bank and brokerage leadership across Dhaka and Chattogram, we have consistently heard the same three pain points:

1. CLIENT EXPERIENCE GAP

Retail investors expect the same quality of app they get from Nagad, bKash, or Rocket. Most firms offer a Windows-only thick client with no learning, no demo, no portfolio analysis. The churn rate on dormant BO accounts is 40%+ in year two.

2. COMPLIANCE IS REACTIVE

Monthly BSEC audit is a scramble of Excel files, PDFs, and phone calls. Margin breaches, short-sale violations, and KYC staleness are caught *after* they become findings — not before.

3. OPERATIONS ARE MANUAL

EOD, fund accounting, custodian ops, and reconciliation are still operated on spreadsheets. A single settlement error can wipe out a month of brokerage margin.

4. IN-HOUSE BUILD IS TOO SLOW

Building a modern investor platform requires 8–12 engineers, 18+ months, and a product team that most firms do not have. DIY projects typically stall around the EOD or KYC module.

The cost of inaction

LEAK	ANNUAL IMPACT (INDICATIVE)
Dormant BO account churn	1,000 accounts × 20,000 BDT avg brokerage/yr = **2 Cr BDT**
BSEC findings & remediation	2–4 audit findings/yr × avg cost = **30–60 Lac BDT**
Reconciliation errors	0.1% of daily settlement = **15–25 Lac BDT**
Missed IPO/Halal/women-investor segments	Lost AUM & fee income = **50 Lac+ BDT**

The insight. None of these leaks need a new product built from scratch. They need a product assembled and deployed — which is exactly what Eduint has spent the last 24 months doing. See §05 for exactly how we did this for Ekush AMC.

05 · CASE STUDY

How Eduint transformed Ekush Investments

Ekush Investments is a Bangladeshi asset management company that manages three unit funds — **EFUF** (Ekush First Unit Fund), **EGF** (Ekush Growth Fund), and **ESRF** (Ekush Shariah Return Fund). Until 2025, Ekush — like most AMCs in Bangladesh — ran its entire operation on spreadsheets.

Before Eduint — the "Excel AMC"

HOW THINGS WORKED

- NAV calculated manually in Excel by the fund accountant, once a day.
- Three separate workbooks per fund — `FIN STATS.xlsx` and `INVESTORS.xlsx`.
- Unit certificates printed on pre-stamped paper and couriered.
- Tax certificates & dividend warrants posted via Bangladesh Post.
- Investor reporting: once-a-year factsheet PDF, printed and mailed.
- SIP handled by bank standing order; collections reconciled by phone.
- Investor complaints routed through the RM's personal WhatsApp.

WHAT IT COST

- **~6 people-days / month** spent on NAV-to-investor pack.
- **14-day delay** between NAV publication and investor visibility.
- **~3% SIP attrition** driven by delayed acknowledgements.
- **Audit findings** on manual journal entries and unreconciled subscriptions.
- **Zero digital touchpoints** with investors — a retention liability.

The Eduint engagement

In 8 weeks, Eduint built and rolled out a full digital AMC stack, branded for Ekush, covering all three funds (EFUF / EGF / ESRF) — admin console, investor portal, and compliance engine — on a modern cloud-native foundation.

After Eduint — today's Ekush

FUNCTION	BEFORE (EXCEL)	AFTER (EDUINT)
NAV calculation	Daily manual Excel	Admin NAV-entry workflow with audit log; history per fund
Unit certificates	Printed, signed, couriered	Self-serve download in investor portal, digitally signed
Tax certificates	Annual manual issue	Auto-generated PDF, year-end one-click dispatch
Dividends	Warrant + postal delivery	Dividend run inside admin, notifications + BEFTN instructions
SIP	Manual bank mandate	SIP module — setup, pause, resume, skip, statement
Investor statements	Annual PDF	Always-live portal + monthly PDF statement
Goals & planning	None	Goal-based investing module (retirement, Hajj, education)
Fund reports	Printed factsheet (annual)	Per-fund dashboards: AUM, NAV history, holdings, returns
Investor support	RM's personal WhatsApp	Ticketing system, SLA-tracked, audit-logged
Compliance	Reactive at audit time	Continuous audit log, approvals workflow, investor KYC freshness

Measured outcomes

-85%
NAV-PACK CYCLE TIME

3×
SIP BOOK GROWTH (6 MO.)

T+1
FROM NAV TO INVESTOR VISIBILITY (WAS T+14)

0
AUDIT FINDINGS POST-ROLLOUT

> **In Ekush's own words.** "We went from three Excel workbooks and a courier to a branded investor portal our unit-holders log into every week. Our RMs now spend time selling, not filing. Our auditor now receives an export, not a box of paper." — Head of Operations, Ekush Investments.

What your firm inherits

Every module built for Ekush — NAV entry, SIP, unit/tax certificates, dividend run, approvals, audit log, fund reports, investor portal — is part of the standard Eduint platform. You don't pay for it to be built. You pay only for it to be deployed, branded and operated for your firm.

06 · PLATFORM OVERVIEW

One platform. Three audiences. Fully white-labeled.

The Eduint platform is a single codebase with role-based experiences for your **retail client**, your **operations staff**, and your **compliance & management** team.

Client-facing experience

Dashboard (DSEX / DS30) · Market Watch · Sector Heatmap · Stock Detail · Top Movers / Breadth · Portfolio & P&L · Portfolio Analysis · Demo Trading · EOD Replay · Learning / Quizzes · Coaching Overlay · BSEC Rule Library · Halal Stocks · Women-Investors Hub · Investor Journey · Trader Biographies · IPO Subscription · Social Sentiment Feed · News Inbox · Finance Tracker · Notification Centre · KYC / Onboarding · WhatsApp + Email Alerts

Asset management (AMC) modules

Multi-Fund NAV Entry · NAV History & Charts · Unit Certificates · Tax Certificates · Dividend Runs · SIP Setup / Pause / Skip · Goal-Based Investing · Fund Reports & Factsheets · Investor Portal & Statements · Approvals Workflow · Excel Bulk Import · Investor Support Tickets

Operations console

Client Management · KYC Admin · Broker Orders · Portfolio Management · Fund Accounting · Custodian Ops · Reconciliation · News Curator · Billing · Learners / Cohorts · Conversion Funnel

Compliance & management

Monthly Audit Report · Margin Breach Log · Trade Exception Log · KYC Freshness Monitor · BSEC Rule Engine · Mistake Detector · Activity Timeline · Board-Ready Dashboards

Technology stack

LAYER	TECHNOLOGY
Front-end	React 19, TypeScript, Vite, Tailwind, React Query
Back-end / data	Supabase (Postgres + RLS), serverless API proxy
Market data	DSE feed via UCB Stock Brokerage execution bridge, shared market-data DB
Messaging	Twilio WhatsApp, Gmail ingest, transactional email
Auth	Supabase Auth + RLS per-tenant isolation
Hosting	Vercel edge network (HA, global CDN)

07 · MODULE INVENTORY

Everything that's ready to ship on Day 1

MODULE FAMILY	CAPABILITY	WHY IT MATTERS TO YOU
Investor Experience	Dashboard, market indices, sector heatmap, movers, breadth	Replaces third-party tools your clients are paying for
	Demo trading sandbox & coaching overlay	Converts beginners into confident, repeat-trading clients
	Portfolio, P&L, sector exposure, analysis	Retention engine — clients log in even on non-trading days
	Halal screening, Women-Investor hub, Investor Journey	Unlocks segments competitors ignore
Learning & Coaching	Structured courses, quizzes, certificates	BSEC-aligned investor education as a retention lever
	Scenario missions & readiness score	Pre-qualifies clients before they touch live capital
	Mistake detector & reflection prompts	Reduces complaint volume and bad trades
Operations	EOD replay engine, fee calculator, order simulator	Replaces manual EOD spreadsheets
	Fund accounting, custodian ops, reconciliation	Cuts back-office reconciliation time by 60–70%
	Broker orders, admin news curator, billing	A single console replaces 4–5 departmental tools
Asset Management (AMC)	Multi-fund NAV entry, history & approvals	Replaces the "daily Excel NAV" — the #1 AMC operational risk
	SIP setup, pause, skip & dividend runs	Grows AUM via systematic investment; cuts RM load
	Unit & tax certificates (self-serve PDF)	Eliminates courier + stamp costs; investor gets instant delivery
	Goal-based investing, fund reports, investor portal	Modern unit-holder experience; retention & referral driver
Compliance & Audit	BSEC rule library, KYC freshness, margin monitor	Makes the monthly audit a 1-click report
	Mistake detector & trade exception log	Turns compliance from reactive to pre-emptive
	Monthly audit deliverable (see §08)	Signed, board-ready PDF every month
Growth & Intel	Social sentiment scraper (Twitter, FB, YT, TikTok, Reddit)	See what the market is saying about your tickers in real time
	News inbox (Gmail ingest) & DSE filings feed	Front-runs manual news monitoring
	Conversion funnel & lead capture	Data-driven marketing, not intuition
Messaging	WhatsApp bot + email + push	Clients never miss a margin call or corporate action
	Templated alerts for margin, settlement, IPO	Reduces phone-call volume to dealer desk

08 · PRICING & PLANS

Three plans · All plans 6 months minimum · All in BDT

ESSENTIALS

৳ 1,00,000 / month

6-month commitment · ৳ 6,00,000 total

For brokers and merchant banks who want a modern client portal and a monthly compliance pulse — fast.

CLIENT EXPERIENCE

- White-labeled client web portal
- Dashboard, market, portfolio, P&L
- Basic KYC onboarding flow
- Learning library & quizzes
- Halal screening

AUDIT & AUTOMATION

- Monthly compliance audit report
- KYC-freshness monitoring
- Email support (business hours)

MOST POPULAR

GROWTH

৳ 1,80,000 / month

6-month commitment · ৳ 10,80,000 total

The recommended plan. Adds demo trading, EOD replay, coaching, and automation for a modern end-to-end client journey.

EVERYTHING IN ESSENTIALS, PLUS

- Demo trading sandbox + scenario missions
- EOD replay engine & statements
- Coaching overlay & mistake detector
- Social sentiment + news inbox
- IPO subscription module
- **AMC:** NAV entry, investor portal, SIP, unit/tax certificates, dividends

AUDIT & AUTOMATION

- Bi-weekly + monthly audit report
- Margin breach & trade-exception automation
- WhatsApp + email alerts
- Priority email & WhatsApp support

PREMIER

৳ 3,00,000 / month

6-month commitment · ৳ 18,00,000 total

Full-stack operations & compliance automation with a named delivery engineer and co-sell partnership rights.

EVERYTHING IN GROWTH, PLUS

- Full operations console — fund accounting, custodian ops, reconciliation, broker orders
- Admin console: learners, KYC, clients, news, billing
- UCB Stock Brokerage OMS integration bridge
- **AMC+:** multi-fund approvals, goal-based investing, per-fund factsheets & audit log
- Custom BSEC rule-engine tuning
- Per-tenant data isolation & dedicated domain

AUDIT & AUTOMATION

- Weekly ops review + monthly board pack
- Dedicated delivery engineer
- 24/7 priority support (4-hour P1 SLA)
- Joint GTM co-sell rights (see §10)

All plans include: hosting, SSL, CDN, daily backups, RLS-isolated database, ongoing product updates, security patching, and onboarding training for up to 10 of your staff. No per-user licence fees. No per-trade fees.

Volume & prepay discounts.

- **5%** off if full 6 months prepaid at signature.
- **10%** off on 12-month commitment (paid quarterly).
- **Founding-partner discount** — the first three firms to sign on Premier receive a locked rate of ৳ 2,50,000/mo for the full first year.

What "Monthly Audit" actually means

On the first business day of every month, Eduint delivers a signed, board-ready PDF covering every regulated surface of your firm — pre-mapped to BSEC and DSE guidelines.

Sections of the monthly report

SECTION	WHAT IT CONTAINS
Executive summary	Traffic-light status across KYC, margin, settlement, complaints & cyber hygiene.
KYC & onboarding	Stale KYC count, expired IDs, pending document cases, re-KYC SLA adherence.
Trade surveillance	Margin breaches, short-sale exceptions, wash-trade candidates, crossed-market flags.
Settlement & reconciliation	T+1/T+2 settlement success rate, failed settlements, broken reconciliations.
Client complaints & NPS	Complaints opened/closed, median-time-to-resolution, NPS pulse from the portal.
BSEC rule alignment	Line-by-line mapping of trades, disclosures, and processes to BSEC rule IDs.
IT & cyber hygiene	Auth logs, admin-action trail, failed-login anomalies, backup integrity checks.
Findings & remediation	Open findings, target close-dates, owners, and links to tickets.

How the audit is produced

1. **Continuously collected** — every event (trade, KYC update, margin call, reconciliation break) is logged into a structured audit trail as it happens.
2. **Auto-aggregated** — on the 1st of the month, the rule engine runs over the prior 30 days of data and classifies findings.
3. **Eduint reviewed** — a senior analyst spot-checks the auto-findings, adds narrative, and signs the PDF.
4. **Delivered** — PDF dropped into your compliance email alias and SharePoint/Drive within 3 business days.

Board-ready. The audit PDF is formatted to be dropped directly into your next board pack — no reformatting required.

The manual work Eduint takes off your team's plate

WORKFLOW	TODAY (MANUAL)	WITH EDUINT (AUTOMATED)
Daily EOD closing	Ops team exports trades from OMS, reconciles manually with CDBL, emails statements to clients.	EOD replay engine runs at cut-off, statements auto-generated & dispatched, exceptions routed to ops console.
Margin monitoring	Risk desk scans positions at 3pm; breaches often caught post-hoc.	Real-time margin engine; WhatsApp + email alert the moment a client crosses 70% utilisation.
KYC refresh	Tracked on a spreadsheet; renewal missed until auditor flags it.	Freshness monitor; 60/30/7-day reminders to client & dealer; auto-lock on expiry.
Client reporting	Monthly P&L generated by hand, emailed as Excel.	Self-serve in portal + monthly PDF auto-sent; includes sector exposure & charges.
Complaint handling	Phone calls, ad-hoc emails, no SLA tracking.	Ticketed intake, assignment rules, SLA clock, NPS capture at close.
IPO subscription	Paper forms + dealer desk.	End-to-end digital IPO application with payment reconciliation.
Fund accounting	Spreadsheet NAV calculation.	Auto NAV + units + subscription/redemption workflow with audit trail.
Reconciliation	Analysts match broker, CDBL & bank files manually.	Three-way reconciliation engine; only breaks surface to a human.
News & disclosures	Compliance officer reads DSE filings PDFs.	Auto-ingest, categorise, alert impacted PMs and clients.
Social sentiment	None — firms are blind to retail buzz.	Multi-platform scraper (Twitter, FB, Reddit, YouTube, TikTok) scanning your tickers every 30 min.

Time saved per month (indicative)

120 h
OPS TEAM

40 h
RISK / MARGIN DESK

60 h

Based on observed savings in peer firms of 60–80 clients using comparable automation modules. Actual savings vary with book size.

Beyond a vendor — a co-sell partner

Eduint is not a traditional software vendor. We are building a long-term capital-markets infrastructure business, and we want the merchant banks and brokerages we serve to become **revenue partners** — not just customers.

The partnership model

On signing any 6-month plan, your firm is eligible to become an **Eduint Authorized Partner**. Under this arrangement:

- Your firm receives the right to **co-sell the Eduint platform** to downstream corporate, HNW and institutional clients.
- Eduint trains 3–5 of your staff to pitch and demo the platform.
- Co-branded collateral: joint deck, one-pager, demo environment, and case studies.
- Eduint handles delivery, support and technical onboarding.
- You own the client relationship & billing on co-sold deals.

Commercial split on co-sold deals

Every new deal signed under the joint go-to-market programme is split three ways — rewarding the party that *introduces* the deal, the platform that *delivers* it, and the person who *closes and services* it:

PARTY	SHARE OF ARR	WHAT THEY DO
Investor / Introducing firm	**30%**	Brings the relationship, signs the MoU, opens the door.
Eduint Limited	**30%**	Delivers the platform, hosting, product roadmap, monthly audit and support.
Employee (closer & account manager)	**40%**	Owns the sales close, relationship, onboarding and ongoing retention.

The split is applied to Year-1 ARR and to every renewal for the life of the account. Employee share is paid monthly as the subscription is collected.

Partner-tier benefits

Co-branded demo
Pitch with "Powered by Eduint" branding.

Revenue share
30% ARR to you as introducer, every year — for life of account.

Sales enablement
Eduint attends joint client meetings.

Marketing credits
Eduint funds joint events & digital.

Preferred roadmap
Partner feature requests get priority.

Exclusivity options
Geographic or segment exclusivity negotiable.

Why this works. Merchant banks and brokerage houses already have existing relationships with corporates, HNW families, family offices, and cooperative banks that need exactly the capabilities Eduint builds. You monetise a relationship you already own; we deliver the product.

Signed partnership — UCB Stock Brokerage Limited

Eduint Limited has signed a partnership with UCB Stock Brokerage Limited to jointly onboard clients. This gives Eduint clients — and their downstream investors — a frictionless path to a fully regulated DSE BO account, trade execution, and settlement, *without* the client firm having to negotiate brokerage, OMS or market-data contracts separately.

In practice: investors can open a UCB-powered BO account directly from within the Eduint-branded portal; KYC data flows digitally between your firm, UCB and the exchange; trade execution, settlement and market data are delivered via a single Eduint-built integration; and co-onboarding clients get priority BO-opening SLAs.

The UCB partnership exists because of an unusual backstory. Adnan served as **Chief Operating Officer of UCB Stock Brokerage Limited** — the #1 brokerage house in Bangladesh — for seven years (2018–2026) before stepping down to found Eduint Limited full-time. Rather than compete, UCB chose to formalise the relationship, signing a co-onboarding partnership that gives Eduint clients direct, preferred access to UCB's regulated DSE infrastructure. That level of alignment — a former COO of the country's top broker on one side, UCB's leadership on the other — is why a truly integrated, co-branded offering is possible.

Ecosystem at a glance

PARTNER	RELATIONSHIP	WHAT THEY BRING
UCB Stock Brokerage Ltd.	**Signed co-onboarding partnership**	DSE TREC, BO account opening, trade execution, settlement, IPO processing, market data
Abaci Investments	Merchant-bank partner · flagship deployment	Regulated merchant banking, PMS, margin loan, the live reference platform at abaci.aibd.ai
Ekush Investments	AMC case study (see §05)	Multi-fund AMC running on Eduint — EFUF, EGF, ESRF
Supabase / Vercel	Cloud infrastructure	Postgres (row-level security), edge CDN, daily backups
Twilio	Messaging	WhatsApp Business & SMS
Google Workspace	News & mail	News ingestion pipeline & transactional email

13 · DELIVERY TIMELINE

From signature to go-live in 30 days

WEEK	EDUINT	YOUR TEAM	MILESTONE
Week 0	Kick-off, brand assets, domain, SSL	Appoint project owner, share logo & brand guidelines	Contract signed, project chartered
Week 1	White-label build, tenant DB provisioned, users imported	Share client list, org chart, escalation matrix	Staging environment live at yourbrand.aibd.ai
Week 2	KYC/onboarding tuned, fee rules configured, branding QA	Provide fee schedules, KYC templates, disclosures	UAT with 5 internal users begins
Week 3	OMS / CDBL integration, training of your staff (up to 10 seats)	Staff attend 4 × 90-min training sessions	Integration tested end-to-end
Week 4	Final security review, soft launch to 50 pilot clients	Compile pilot client list, dispatch launch comms	**Go-live**
Week 5–6	Hypercare, weekly stand-ups, first audit cut	Monitor, funnel feedback into Eduint backlog	First monthly audit delivered
Month 2+	Steady-state operations, monthly audits, quarterly business review	Growth & retention campaigns, partner co-sell motion	Full rollout to all clients

Risks & mitigations

RISK	MITIGATION
OMS integration delays	Platform runs fully on demo/paper data until OMS bridge is live — no go-live slippage on client experience.
Regulatory change mid-contract	BSEC rule engine updated by Eduint within 15 days of notification at no extra charge.
Internal change management	Eduint ships a 2-week training plan, recorded videos, and on-call support for dealer desk.
Data residency	Option to host on Bangladesh-resident infrastructure at Premier tier.

Clean, transparent, opex-only

Key terms

ITEM	TERMS
Minimum engagement	6 months, starting on the go-live date.
Billing cycle	Monthly in advance, by the 5th of each month.
Currency	Bangladeshi Taka (BDT). VAT extra as applicable.
Payment methods	BEFTN, RTGS, or cheque to Eduint Limited account.
Price lock	Subscription fee locked for 12 months from signature.
Onboarding	One-time, included in the first month (no separate setup fee).
Data ownership	Your firm owns 100% of your data. Export on demand, any time.
Exit	30 days written notice after Month 6. Full data export in CSV/JSON at no cost.
SLA uptime	99.5% (Essentials) · 99.7% (Growth) · 99.9% (Premier)
Security	RLS-isolated per-tenant Postgres, encrypted at rest & in transit, daily backups, audit logging.
Confidentiality	Mutual NDA signed before onboarding starts.
Liability cap	Equal to 6 months of subscription fees paid.

Out-of-scope (separately quoted)

- Bespoke feature work beyond the module inventory in §05.
- Integrations with systems not on the supported list (available on request).
- On-premise deployment (cloud SaaS only in this proposal).
- BSEC licence filings or legal counsel.

Commercial summary

PLAN	MONTHLY	6-MONTH TOTAL	WITH 5% PREPAY DISCOUNT
Essentials	৳ 1,00,000	৳ 6,00,000	**৳ 5,70,000**
Growth	৳ 1,80,000	৳ 10,80,000	**৳ 10,26,000**
Premier	৳ 3,00,000	৳ 18,00,000	**৳ 17,10,000**

15 · NEXT STEPS

Three steps to go live

STEP 1 · WEEK 0

Discovery call

A 60-minute working session with Eduint + your ops, compliance and technology leads to confirm tier selection, scope, and integration points.

MOST POPULAR

STEP 2 · WEEK 0

Sign engagement

Sign a 6-month engagement letter & mutual NDA. First month's invoice raised. Eduint provisions staging environment within 72 hours.

STEP 3 · WEEK 4

Go-live

Soft-launch to a pilot cohort of clients, first monthly audit scheduled, partner co-sell programme activated on Premier tier.

Founding-partner window is open until 30 June 2026. The first three firms to sign Premier lock in ৳ 2,50,000/month for their first year — and receive joint PR + a launch event underwritten by Eduint.
